

Winnaars van de Nederlandse Zoölogieprijs *Recipients of the Dutch Zoology Prize*

2020: **Wilko Verberk**, *Understanding the adaptive value of species traits in fishes and aquatic invertebrates*

In 2019 the prize was not awarded

2018: **Sjouke Anne Kingma**, *Ecological and evolutionary processes underlying group living and cooperation in animals*

In 2017 the prize was not awarded.

2016: **Maurijn van der Zee**, *On the function of the insect serosa.*

2015: **Wouter Halfwerk**, *Understanding selective forces operating on multimodal communication in tungara frogs.*

2014: **Rudy Jonker**, *Trans-generational responses to a changing world.*

2013: **Bertanne Visser**, *Evolutionary physiology - Linking gene to function.*

2012: **Gretha Boersma**, *Animal personalities and coping style: their roles in health and disease*

In 2011 the prize was not awarded.

2010: **Martine Maan**, *On the selective forces that drive the origin, maintenance and evolutionary consequences of animal colour diversity*

2009: **David Lentink**, *Mechanisms and evolution of animal locomotion*

2008: **Joris M. Koene**, *Sexual conflict*

2007: **Jan van Gils**, *In the footsteps of Jan Verwey: How flexible phenotypes reflect ambient ecological conditions*

2006: **Mark O. Huising**, *Communication in the endocrine and immune systems: Physiology and phylogeny*

2005: **Sander van Doorn**, *Sexual selection and sympatric speciation*

2004: **Irene Tieleman**, *Coping with challenges in different environments - Larks along an aridity gradient, and beyond*

2003: **Sander Kranenbarg**, *Does oxygen constrain size and shape of the teleost embryo?*

2002: **Jacintha Ellers**, *Fat or eggs? The evolution of resource allocation in heterogeneous environments*

2001: **Johan Bolhuis**, *Neural mechanisms of song learning in zebra finches*

2000: **Jan Komdeur**, *Partner choice and sex ratio adjustment as exponents of sexual selection*

In 1999 the prize was not awarded.

1998: **Ole Seehausen**, *Sexually selected species diversity as a function of communication channel width*

1997: **Bruno Ens**, *Career planning in oystercatchers*

1996: **Eddy A. van der Zee**, *Muscarinic cholinceptive systems: distribution of muscarinic acetylcholine receptors and behaviourally induced plasticity in the brain*

1995: **Kees J. Nagelkerke**, *Evolution of sex allocation strategies in pseudo-arrhenotokous predatory mites*

1994: **Theunis Piersma**, *Energetic bottle-necks and the evolution of migratory routes of sandpipers*

1993: **Arie P. Otte**, *Molecular mechanisms of neural induction and competence*

1992: **Marcel Dicke**, *Predator-prey interactions in a tritrophic context*

1991: **Herbert H.T. Prins**, *Ecology and behaviour of the African buffalo*
